OVERVIEW

YOUR $25 TRADING WELCOME

Start with US$25 in trading credit without making a deposit. The credit supports trading in your eligible account and cannot itself be withdrawn.

Offer Detail	At a Glance
Bonus amount	US$25 in trading credit, granted once
Deposit required	None to claim the bonus
Who can claim	Eligible new clients registered directly with XQuotes
Verification	Required before credit is issued
Account and region	An eligible account in a supported region; confirm availability through the Client Portal or support
Welcome-offer limit	One US$25 No-Deposit Bonus per client and household. Household and IP restrictions apply. Clients may claim a deposit welcome bonus after completing the No-Deposit Bonus Programme, subject to the applicable campaign terms and conditions.
Trading volume for profit release	At least 1 qualifying standard lot in total
Completed trades	At least 5 qualifying round trades
Minimum profit withdrawal	US$5 per request
Maximum profit withdrawal	US$200 cumulatively per client, including authorised profit transfers
Bonus principal	The US$25 credit cannot be withdrawn
NDB wallet	Dedicated restricted wallet; profits cannot be withdrawn or transferred before requirements are met

Choose one welcome offer. Clients who claim the US$25 No-Deposit Bonus (NDB) may become eligible for the deposit welcome campaign after completing the NDB programme. This includes the 100% first-deposit bonus and the 50% later-deposit bonus, subject to the applicable campaign terms and conditions.

HOW TO GET STARTED

OPEN YOUR ACCOUNT
Register directly with XQuotes and select an account eligible for the NDB offer.

COMPLETE VERIFICATION
Submit the required proof of identity and address. Check that the offer is available in your region.

SELECT THE $25 BONUS
Read and accept the programme terms, then follow the Client Portal instructions to select the no-deposit welcome offer. No deposit is required.

CHECK YOUR CREDIT
Confirm that US$25 in credit has been allocated to the designated NDB wallet and is available to the associated trading account. Review the trading and withdrawal conditions before using it.

Need assistance? Chat with the XQuotes team.

BONUS DETAILS

The NDB bonus is granted once to each eligible client. Keep its credit and trading activity separate from your deposit-funded trading. Depositing your own funds does not create another NDB entitlement or automatically unlock restricted NDB profits.

TWO TRADING REQUIREMENTS

Requirement	Minimum
Total qualifying trading volume	1 standard lot
Completed qualifying round trades	5

Both requirements must be met. The 1-lot requirement is the total qualifying volume across completed trades; it is not a requirement to trade 1 lot in a single position.

HOW THE REQUIREMENTS WORK TOGETHER

Total Qualifying Volume	Completed Qualifying Round Trades	Both Trading Requirements Met?
0.50 lot	5	No - volume is below 1 lot
1.00 lot	4	No—fewer than 5 round trades
1.00 lot	5	Yes—subject to the remaining programme conditions

A round trade is one position opened and fully closed. Its eligible volume is counted once when fully closed; opening and closing are not counted as two separate lots. Partial closes do not create additional round trades. Instrument volume is measured in standard-lot equivalents under the NDB trading specifications.
These examples illustrate qualification only. Meeting the requirements does not guarantee a profit or a withdrawal.

WITHDRAWAL RULES

1 

BONUS CREDIT CANNOT BE WITHDRAWN
The US$25 is promotional trading credit. It is not included in withdrawable profits and does not become cash when qualification requirements are met.

2 

NDB FUNDS ARE RESTRICTED UNTIL QUALIFICATION
Use the dedicated NDB wallet and its associated trading account. NDB profits cannot be transferred to another wallet or withdrawn before verification, trading requirements and programme checks are completed. Making credit available to its designated trading account does not unlock it for withdrawal. Close all NDB positions before submitting a profit-release request.

3 

MEET BOTH TRADING REQUIREMENTS
Before requesting profit release, complete at least 1 qualifying standard lot in total and at least 5 qualifying round trades. Only eligible realised profits may be released.

4 

MINIMUM AND MAXIMUM WITHDRAWALS
The minimum eligible profit release is US$5 per request. Total NDB profit releases cannot exceed US$200 per client. Authorised transfers to another wallet count towards this cap; subsequently withdrawing the same released funds does not count again.

5 

WITHDRAWALS AFFECT REMAINING CREDIT
At each authorised profit release, remaining credit is reduced proportionally: **Credit removed = Remaining NDB credit before release × (Profit released ÷ Eligible unreleased profit before release).** The deduction cannot exceed remaining credit. If all eligible profit is released, or the US$200 cumulative cap is reached, all remaining NDB credit is removed.

6 

CHECK YOUR AVAILABLE MARGIN

All NDB positions must be closed before profit release. Check the amount to be released, the credit deduction and your remaining allowance. Bonus credit cannot be transferred or withdrawn as cash.

Credit deduction example

Remaining credit US$25; eligible unreleased profit US$100; authorised release US$50. Credit removed = US$25 × (US$50 ÷ US$100) = US$12.50. Credit remaining = US$12.50. This example assumes the cumulative cap has not been reached.

Profit release examples

The following independent examples assume all qualification checks are complete, all NDB positions are closed and the amounts shown are eligible net trading profits.

Eligible Realised Profit	Previously Released	Maximum Further Release
US$50	US$0	US$50
US$250	US$0	US$200
US$80 remaining	US$150	US$50

Each row is independent. Amounts shown exclude the non-withdrawable US$25 credit. The examples are not forecasts of earnings.

Cashback and other incentives

Trading funded entirely by free NDB credit does not generate customer cashback or self-rebates. A holding period of more than two minutes does not change this funding restriction. Partner commissions follow the separate partner terms; the customer cashback funding rule does not automatically determine partner commissions.

TERMS & CONDITIONS

1. Promotion period

The promotion is available from November 2026 until further notice, subject to availability confirmed for the client before activation.

2. Offer

Eligible new clients may receive a one-time US$25 no-deposit trading bonus. No deposit is required to receive the credit.

3. Client eligibility

Clients must be at least 18 years old and meet the legal age requirement in their country of residence. Clients must be new to XQuotes and must not have previously received this type of bonus. Anyone directly or indirectly related to XQuotes is excluded, as defined in the approved full programme terms.

4. Direct registration and availability

The offer is available only to eligible clients registered directly with XQuotes, subject to country-of-residence eligibility and applicable account-opening requirements. Clients must confirm NDB availability through the Client Portal or support before accepting the offer. The deposit campaign's partner-client eligibility does not automatically apply to this offer.

5. Verification and acceptance

Clients must complete account verification, read and accept the programme terms, and complete the required bonus-selection steps before credit is applied. Credit is made available through the designated NDB wallet and associated eligible trading account.

6. One welcome offer

One welcome bonus is available per client and household. Clients who claim the NDB welcome bonus cannot participate in either tier of the deposit welcome campaign. Re-registering or opening another account does not create a new entitlement.

7. Household and linked accounts

If a household member has already received the NDB bonus, other household members are not eligible. XQuotes may disqualify a recipient sharing an IP address with an existing bonus account holder. Linked address, device or payment-account activity is subject to the approved programme's duplicate-claim controls.

8. Nature of credit

The bonus supports trading only. The US$25 principal is non-withdrawable and cannot be converted into withdrawable cash by completing the trading requirements. Bonus credit does not guarantee profits or protect against trading losses.

9. Restricted wallet

NDB credit and profits are recorded in a dedicated restricted wallet or associated trading account. Profits cannot be withdrawn or transferred to another wallet before qualification and programme checks are complete. All NDB positions must be closed before profit release. After qualification, only the authorised eligible-profit amount may be released; remaining bonus principal stays restricted.

10. Trading qualification

Before requesting eligible-profit release, clients must trade at least 1 qualifying standard lot in total and complete at least 5 qualifying round trades. Both conditions apply. One round trade is a position opened and fully closed. Volume is counted once on full closure, in standard-lot equivalents under the NDB instrument specifications. Partial closes do not create extra round trades. Trades do not become ineligible solely because of their duration; prohibited abuse remains subject to item 15.

11. Profit withdrawal limits

The minimum eligible profit release is US$5 per request. Total authorised NDB profit releases are capped at US$200 per client, including transfers to another wallet. A subsequent withdrawal of the same released funds is not counted twice. Reaching the cap ends the NDB offer: remaining credit is removed and unreleased NDB profits above the cap are not available for release under this promotion.

12. Credit deduction and transfers

Eligible unreleased profit means positive realised net trading profit remaining in the NDB account, after trading losses and applicable trading costs, excluding bonus principal and amounts already released. At the time an authorised release is processed: Credit removed = Remaining NDB credit before release × (Profit released ÷ Eligible unreleased profit before release).

TERMS & CONDITIONS

The release cannot exceed eligible unreleased profit or the remaining US$200 allowance. No release is processed when eligible unreleased profit is zero or negative. Deductions are capped at remaining credit. Releasing all eligible profit removes all remaining credit; reaching the cumulative cap also removes all remaining credit. Transfers of released profits must not bypass the cap or trigger a duplicate credit deduction.

13. Trading profits and rewards

Clients may close trades at any time. There is no NDB minimum holding period or automatic 60-second, 90-second or 80% test for trading-profit eligibility. Legitimate short-duration trades are not disqualified solely by duration. Trading funded only by NDB credit does not earn customer cashback or self-rebates, including when held longer than two minutes. Trades funded by NDB credit do not generate partner commissions. Prohibited abuse remains subject to item 15.

14. Leverage and margin

Leverage and margin are subject to the limits applicable to the client's eligible account, instrument and position size. Any additional NDB restriction must be disclosed before the client accepts the offer. Clients must review margin requirements and consider the effect of bonus deductions on open positions.

15. Misuse

The offer is intended for genuine trading. Abuse or arbitrage intended to exploit the promotion voids the offer. Fake or duplicate claims, latency arbitrage or exploitation of delayed or incorrect prices, coordinated hedging to exploit the promotion, and bonus or cashback arbitrage are prohibited. Where abuse is identified, XQuotes may disqualify the client, remove bonus credit and cancel profits attributable to the affected trades, with written notice. Short trade duration alone does not establish abuse.

16. Changes to the promotion

XQuotes may amend or withdraw the promotion with notice on its website. Bonuses already credited follow the terms in force when they were credited.

17. Risk disclosure

CFDs are leveraged products and carry a high risk of losing money rapidly. Bonus credit does not remove market risk. Review the effect of credit removal on available margin and open positions. Risk disclosures: https://www.xquotes.co/company/risk-disclosures

18. Full terms and support

These key terms summarise the promotion and do not replace the full NDB programme terms. Full NDB terms: https://www.xquotes.co/incentives/bonuses

For assistance, contact XQuotes through the Client Portal.
