xquotes

100% BONUS FIRST DEPOSIT

Double up your trading power on your first deposit.

100% on your first deposit, up to $200
50% on subsequent deposits, up to $400

Promo Period: From November 2026 onwards

Bonus credit is non-withdrawable. Eligibility and withdrawal conditions apply. See the terms below. CFDs are leveraged products and carry a high risk of losing money rapidly.

www.xquotes.co

OVERVIEW

YOUR DEPOSIT. ADDITIONAL TRADING CREDIT.
Receive bonus credit on qualifying deposits to support your available trading margin. Your deposited funds and promotional bonus are recorded separately.

Offer Detail	At a Glance
First-deposit bonus	100% of your first qualifying deposit, up to US$200
Later-deposit bonus	50% of subsequent qualifying deposits, up to US$400 cumulatively per client
Eligible trading account	MT5 Standard
Verification	Required
Eligible clients	Verified new and existing MT5 Standard clients, including eligible clients registered through XQuotes partners
Regional availability	Subject to country-of-residence eligibility and availability confirmed in the Client Portal.
Partner clients	Eligible, subject to programme conditions
Excluded accounts	Partners' own accounts, staff accounts, Mini accounts and MAM/PAMM accounts
Welcome-offer limit	One deposit welcome bonus per client and household. Clients who have claimed the US$25 No-Deposit Welcome Bonus may still qualify for this campaign after completing the No-Deposit Bonus Programme.
Bonus withdrawals	Bonus credit cannot itself be withdrawn
Own-funds withdrawals	Your own balance, including eligible profits, may be withdrawn subject to the withdrawal and trading-profit rules
Effect of withdrawals	Withdrawals and transfers of own funds out of the participating promotional arrangement reduce bonus credit proportionally. Transfers into the participating MT5 account for trading do not.
Bonus validity	Each bonus credit expires 90 days after crediting
Inactivity	The remaining bonus is removed after 30 consecutive days with no open positions and no executed trades.
Low-balance removal	Remaining bonus is removed when the relevant trading-account balance reaches US$0.01 or below
Minimum Deposit	$10

The US$400 later-deposit cap applies cumulatively across all later qualifying deposits.
You cannot claim both the deposit welcome bonus and the US$25 no-deposit welcome bonus.
For this promotion, a household includes accounts sharing the same address, device, IP address or payment account.

HOW TO GET STARTED

OPEN AN ELIGIBLE ACCOUNT
Register and open an MT5 Standard account, or sign in and select an eligible existing MT5 Standard account.

COMPLETE VERIFICATION
Submit the required identity and address documents.

ACCEPT THE OFFER AND DEPOSIT
Check eligibility, read and accept the promotion terms, and follow the Client Portal instructions to activate the offer and make a qualifying deposit.

Deposits must be made in your own name through an eligible payment channel listed in the Client Portal. Internal transfers and refunds do not qualify.

CHECK YOUR FUNDS AND BONUS
Confirm that your deposit and bonus have been recorded in their respective wallets and that the bonus is available for use in your eligible trading account.

BONUS DETAILS

First Deposit: 100% Bonus, Up To US$200
For every US$1 in your first qualifying deposit, receive US$1 in bonus credit. The maximum first-deposit bonus is US$200. Depositing more than US$200 does not increase your first-deposit bonus beyond US$200.

Your First Qualifying Deposit	Bonus Credit You Receive
US$100	US$100
US$200	US$200
US$300	US$200

For new and eligible existing clients, "first qualifying deposit" means the first eligible external deposit after activating this offer.

The 100% rate applies to one deposit only. Any unused portion of the US$200 first-deposit allowance does not carry forward.

LATER DEPOSITS: 50% BONUS
Later qualifying deposits receive 50% bonus credit until your cumulative later-deposit bonuses reach US$400.

The examples below assume the full US$400 allowance remains available. If you have already received later-deposit bonuses, the amount credited is limited to your remaining allowance.

Later Qualifying Deposit	Bonus Credit Assuming the Full US$400 Allowance Remains
US$100	US$50
US$200	US$100
US$400	US$200
US$800	US$400

YOUR DEPOSIT AND BONUS ARE RECORDED SEPARATELY

Your qualifying deposit is credited to your deposit wallet. The promotional amount is credited separately to the relevant first-deposit or reload bonus wallet.

For example:

- First qualifying deposit of US$100: US$100 goes to your deposit wallet and US$100 is credited to your first-deposit bonus wallet.
- Later qualifying deposit of US$100: US$100 goes to your deposit wallet and US$50 is credited to your reload bonus wallet, provided sufficient bonus allowance remains.

Deposited funds remain your own funds. Promotional credit is subject to the bonus restrictions and does not become withdrawable merely because it is held in a separate wallet.

CASHBACK ALONGSIDE YOUR BONUS

Cashback is available on qualifying closed trades held for more than two minutes, subject to the applicable cashback terms.

On accounts with active bonus credit, only the proportion of trading volume attributable to the client's own funds qualifies for cashback:

Eligible cashback volume = Closed traded volume × (1 - Credit ÷ (Balance + Credit)).

Example: With a balance of US$200 and bonus credit of US$200, a qualifying one-lot closed trade produces 0.5 lot of eligible cashback volume. The bonus-funded portion earns no cashback.

Partner commissions are calculated separately on qualifying closed lots under the applicable partner terms. The cashback funding formula does not automatically apply to partner commissions.

The same own-funds adjustment applies to self-rebates. Balance and Credit are measured immediately before the position opens; that proportion is retained for qualifying partial closes.

WITHDRAWAL RULES

1

BONUS CREDIT CANNOT BE WITHDRAWN
The bonus is provided exclusively for trading and cannot itself be withdrawn.

2

YOUR OWN FUNDS MAY BE WITHDRAWN
You may request withdrawals of your deposited funds and eligible trading profits, subject to the applicable trading-profit rules, standard withdrawal checks and sufficient available funds. Withdrawals reduce bonus credit proportionally.

3

WITHDRAWALS AND TRANSFERS OUT REDUCE BONUS CREDIT
Withdrawals and transfers of your own funds out of the participating promotional arrangement trigger a proportional bonus deduction. Transfers that allocate funds or credit to the participating MT5 account for trading do not, by themselves, trigger a deduction.

Bonus removed = original bonus received × (amount withdrawn or transferred ÷ associated qualifying deposit). The deduction cannot exceed the remaining bonus credit.

Example: Deposit US$200 and receive US$200 bonus credit. A US$100 withdrawal removes US$100 of bonus credit, leaving US$100.

Each row is a separate example starting with a US$200 deposit and US$200 bonus. The rows do not represent consecutive withdrawals.

Deposit	Withdrawal	% of Deposit	Bonus Change	Bonus Left
US$200	US$0 (Initial setup)	0%	US$0	US$200
US$200	US$50	25%	-US$50	US$150
US$200	US$100	50%	-US$100	US$100
US$200	US$200	100%	-US$200	US$0

Where several qualifying deposits have generated bonus credit, withdrawal amounts are allocated against qualifying deposits in chronological order, starting with the oldest.

Each deposit's associated bonus is reduced using its original deposit and bonus amounts. Previously allocated withdrawal amounts are tracked so that the same deposit allowance is not counted twice.

No deduction may exceed the remaining associated bonus credit. Where associated credit has already expired or been removed, no further credit is deducted for that allocation.

4

CHECK BEFORE YOU WITHDRAW

Review the full deposit-bonus terms or contact support to understand how a withdrawal affects your remaining credit and available trading margin.

4

BONUS REMOVAL AT LOW BALANCE

If the participating MT5 trading-account balance, excluding bonus credit, reaches US$0.01 or below, any remaining bonus credit is removed. This rule may apply while positions are open. Bonus removal reduces available margin and may cause a stop-out.

TERMS & CONDITIONS

1. Promotion period
The promotion begins on 11 November 2026 at 00:00 server time (GMT+8) and continues until XQuotes ends it by publishing notice on its website.

2. Bonus rates and allowances
Eligible clients may receive 100% bonus credit on their first qualifying deposit, capped at US$200. Subsequent qualifying deposits receive 50% bonus credit, subject to a cumulative maximum of US$400 across all later qualifying deposits.
For this promotion, "first qualifying deposit" means the first eligible external deposit made after the client activates the offer. Eligible existing clients may participate if they have not previously claimed this deposit welcome offer or the US$25 no-deposit welcome offer. **Clients who claimed the US$25 no-deposit welcome offer may participate after completing the no-deposit bonus programme, as defined in item 4.**

The 100% rate applies to one qualifying deposit only. Any unused portion of the US$200 first-deposit allowance does not carry forward. Subsequent qualifying deposits receive the 50% rate. The US$400 subsequent-deposit allowance is cumulative per client, not per account. Bonus removal, expiry or trading losses do not restore previously used allowance.

3. Eligible clients and accounts
The promotion is available to verified new and existing clients with eligible MT5 Standard accounts, including eligible clients registered through XQuotes partners, subject to country-of-residence eligibility and applicable account-opening requirements.
Partners' own accounts, staff accounts, Mini accounts and MAM/PAMM accounts are excluded. Clients must confirm that the promotion is available to their account through the Client Portal before making a deposit to claim the bonus.

4. Welcome-offer and household restrictions
One welcome bonus is available per client and household. Clients cannot claim both the deposit welcome bonus and the US$25 no-deposit welcome bonus. A household means the same address, device, IP or payment account.
Clients who have claimed the US$25 no-deposit welcome bonus are not eligible for either tier of this deposit welcome campaign. **Clients who claimed the US$25 no-deposit welcome bonus may activate this offer only after completing the no-deposit bonus programme.**

Completing means the no-deposit bonus credit has expired or been removed and any eligible no-deposit profit withdrawal has been processed.

5. Activation and low-balance removal
Clients must review and accept the promotion terms and complete the required activation and qualifying-deposit steps. The bonus supports trading margin only. If the participating MT5 trading-account balance, excluding promotional credit, reaches US$0.01 or below, any remaining bonus credit is removed. Removal may occur while positions are open. Clients must maintain sufficient free margin because bonus removal may cause a stop-out.

6. Nature of bonus credit
The bonus is provided exclusively as trading credit to support available trading margin. The bonus itself cannot be withdrawn and does not guarantee profits or protect deposited funds against trading losses.

7. Qualifying deposits and crediting
Bonus credit is applied after all qualifying steps are completed. A qualifying deposit is in the client's own name, through the payment channels listed in the Client Portal. Internal transfers and refunds do not qualify.

8. Withdrawals
Clients may request withdrawals of deposited funds and eligible trading profits, subject to the applicable trading-profit rules, standard withdrawal checks and sufficient available funds. Withdrawals and transfers out reduce bonus credit proportionally, subject to the transfer exceptions in item 10 and the calculation in the Withdrawal Rules.

9. Cashback, self-rebates and partner commissions
Customer cashback and self-rebates on accounts with active bonus credit are calculated using the own-funds proportion: **Eligible reward volume = Qualifying closed traded volume × (1 − Credit ÷ (Balance + Credit)).**
Balance and Credit are recorded in the participating MT5 trading account immediately before the position opens. Balance excludes promotional credit. This funding proportion is retained when calculating rewards on qualifying closed volume, including partial closes.
The eligible proportion is limited to between 0% and 100%. If Balance plus Credit is zero or negative, no reward volume is counted.
Partner commissions are calculated separately on qualifying closed lots under the applicable partner terms, without the own-funds adjustment.
Customer cashback, self-rebates and partner commissions require a trade holding period of more than two minutes and compliance with their respective programme conditions.

TERMS & CONDITIONS

10. Wallets and transfers

Qualifying deposits and promotional credit are recorded separately in the deposit wallet and the relevant first-deposit or reload bonus wallet. Bonus credit remains non-withdrawable. Any permitted movement of bonus credit for trading remains subject to the programme's wallet and transfer restrictions. Transfers that allocate deposited funds or bonus credit to the participating MT5 account for trading do not, by themselves, trigger a bonus deduction.

Withdrawals or transfers of the client's own funds out of the participating promotional arrangement trigger the proportional deduction described in the Withdrawal Rules.

Moving bonus credit for trading does not convert it into withdrawable cash. The same movement of funds must not trigger more than one bonus deduction.

11. Misuse of the promotion

The promotion is intended for genuine trading. Abuse of the promotion includes:

- Latency arbitrage or exploitation of delayed or incorrect prices.
- Internal hedging or hedging coordinated with other parties or accounts.
- Keeping an account fully hedged for more than 50% of trading time.
- Abuse of negative balance protection.
- Cashback or bonus arbitrage.
- Multiple accounts used from the same device or IP to exploit the promotion.
- Multiple accounts using one bank account or controlled by one ultimate beneficiary to exploit the promotion.
- Sharing trading passwords.
- Third-party deposits.

XQuotes may then remove the bonus and cancel cashback and profits on the trades involved, with written notice to the client.

12. Changes to the promotion

XQuotes may amend, suspend or end the promotion with notice on its website. Bonuses already credited follow the terms in force when they were credited.

13. Risk disclosure

CFDs are leveraged products and carry a high risk of losing money rapidly. Read the full risk disclosures before trading with bonus credit.

Risk disclosures: https://www.xquotes.co/company/risk-disclosures

14. Full terms and support

These key terms summarise the promotion and do not replace the full programme terms.

Full deposit-bonus terms:
https://www.xquotes.co/incentives/bonuses

For assistance, contact XQuotes through the Client Portal.

15. Trading duration and profit eligibility

Clients may close trades at any time. There is no minimum holding period for trading-profit eligibility solely because bonus credit is active.

Cashback is available only on qualifying closed trades held for more than two minutes. Trades held for exactly two minutes or less do not qualify for cashback.

Failure to qualify for cashback does not, by itself, invalidate trading profits. Activities prohibited under the misuse provisions remain subject to review and the stated enforcement measures.

16. Leverage and margin

Leverage is subject to the limits applicable to the client's account, instrument and position size. Dynamic margin requirements apply. Clients must review the leverage and margin requirements displayed in the trading platform before opening a position.

Any additional leverage restriction applying to accounts with active bonus credit must be disclosed before the client accepts the offer. Changes to leverage or margin requirements are governed by the applicable account terms.

17. Bonus validity and expiry

Each bonus credit has its own 90-day validity period, measured from its crediting timestamp. Any remaining credit is removed at 01:30 server time (GMT+8) on the calendar day after that validity period ends. Later deposits do not extend earlier bonus credits.

18. Inactivity

Remaining bonus credit is removed after 30 consecutive days with no open positions and no executed trades. Deposits, withdrawals and portal logins do not constitute trading activity.
